working on)

Primary Care, -Indigenous healthcare workers and community members with lived experience as well as those from other equity-deserving populations, - Community health centres and Public Health (health promotion), - Community pharmacy representation, -	1) Explore opportunities for alignment of priorities from established working groups and networks that focus on Mental Health and	Understand what the established working groups and networks in the Elgin community are prioritizing for mental health addictions. This will involve reaching out to the Elgin Community Drug and Alcohol Strategy (ECDAS) working group, the Elgin Mental Health and
	2) Develop an Elgin-Specific MHA indicator.	As work with the COPD Journey Mapping is completed, gaps and opportunities will be identified. Additionally, the Elgin Community and Drug and Alcohol Plan will be released end of March, which will provide more direction on action items specific to the Elgin
-Primary care, -Indigenous healthcare workers and community members with lived experience as well as those from other equity-deserving populations, - Community health centres and Public Health (health promotion), - Community pharmacy representation, -	1) From the journey mapping and care model co-design, selecting and prioritizing opportunities for improving care for community	Conducting journey mapping with stakeholders from the local healthcare system to identify areas of improvement in the local health system. Prioritizing these areas based on impact to the quadruple aim and stakeholder capacity. Select change ideas following
	2) Select an indicator to measure the change ideas from the journey mapping exercise and care model co-design for patients with	Explore utilizing IntelliHealth to identify an indicator or indicators that will help measure impact of change initiatives being implemented from the journey mapping for patients with COPD in Elgin.
-Primary care, -Indigenous healthcare workers and community members with lived experience as well as those from other equity-	1) Explore and identify causes as to why Elgin rates for cancer screening are so low in comparison to provincial rates.	Explore available data sources to better understand the population who is eligible, but not up to date with cervical, breast, and/or colorectal cancer screening.
-Primary care, -Indigenous healthcare workers and community members with lived experience as well as those from other equity-	1) Understand why people decline preventative cancer screening.	Explore data collection questions and processes to track patients/clients who decline preventative care screening and their reasoning.
-Primary care, -Indigenous healthcare workers and community members with lived experience as well as those from other equity-	1) Identify change initiatives that come from identifying causes for lower rates and reasons for declining cancer screening.	Through identifying causes for lower rates and reasons for declining cancer screening, select a change idea that will affect cancer screening in a positive direction.
